ECO ELEGANCE

Originally a family estate on the Dominican Republic's rugged and jungle-covered southern coast, Casa Bonita hotel strikes the perfect balance between eco-conscious clean living and tropical luxury. The hundreds of acres now boast an organic garden that supplies the restaurant, private canopy tours just for guests and Caribbean Sea views from every room.

Look closely at your coffee tables and the decorative bowls, and you'll see they're all made from reclaimed wood and found natural objects. The hotel's Tanama Eco Spa offers a full range of services, from couple's massages to body wraps, with 90 per cent of products made from organic local ingredients.
